

BIGGEST IN THE WORLD.

THE NEW DAM TO BE BUILT IN THE TOWN OF CORTLANDT.

It Will Take Seven Years to Do the Work. The Dam Will Cost \$8,000,000—It Will Hold 44,000,000,000 Gallons of Water, and When It Is Complete Fear of a Scarcity of Water Will Be Ended.

The Aqueduct Commissioners are going to build the biggest dam in the world in the town of Cortlandt. It will tower above every other structure of its kind ever before attempted, and its top will join two hills nearly 2,000 feet apart. Back of it will be a monster reservoir where 44,000,000,000 gallons of water will be stored, and New York city will for fifty years at least be without fear of a water famine or of even a scarcity in the dry summer. It will also enable the city to get the water from all of its watershed where now it only gets about one half.

The building of this dam is one of the largest engineering works of the day. The dam will take the place of the one that the Aqueduct Commissioners proposed building on the Quaker Bridge site. The site is about 3 1/2 miles below the present Croton dam and 1 1/2 miles above the Quaker Bridge site. The city has not at present a sufficient storage system.

CROTON WATER SHED, SHOWING THE LOCATION OF THE PRESENT DAM AND THE PROPOSED NEW DAM—LIGHT PART THE WATER SHED NOW DRAINAGE, DARK PART WHERE THE WATER RUNS TO WASTE NOW THAT WILL BE SAVED BY THE NEW DAM.

The need of it is what has induced the Aqueduct Board to undertake this tremendous job. The selection of the site to build the dam was made at a recent special meeting of the Commissioners. The site was chosen because it will give a drainage area of twenty-one miles more than any of the other sites proposed. Each year the Commissioners advertised for bids for the work.

"Some idea of the weightiness of the structure can be obtained from the excavating and

THE PROPOSED DAM.

granite facing stone masonry, and 70,000 cubic yards of other masonry are required. Besides the earth excavation there will be 300,000 cubic yards of solid rock excavation and 100,000 cubic yards of rock excavation. The dam will be 1,000 feet high, and the water level will be 100 feet above the top of the dam. The dam will be 1,000 feet high, and the water level will be 100 feet above the top of the dam.

Not the least simple question in the problem of the construction of the new dam is the drainage of the water. The water level will be 100 feet above the top of the dam, and the water level will be 100 feet above the top of the dam.

COMPARED WITH OTHER BIG DAMS. Nearly all of it is to be obtained in the nearby quarries, but the stone will have to be brought from a distance, and an enormous amount of the stone will be used in the construction of the dam.

COMPARED WITH OTHER BIG DAMS. Nearly all of it is to be obtained in the nearby quarries, but the stone will have to be brought from a distance, and an enormous amount of the stone will be used in the construction of the dam.

the river, and in continuation of the central part of the dam, an embankment containing a central masonry wall, built on the solid rock to be excavated; a gate chamber is to be established in communication between the old aqueduct and the proposed reservoir, leaving a paving or adding in to protect the surface of the embankment.

A channel is to be excavated for the purpose of diverting the waters of the river before work can be begun near its present bed, and roads must be built to turn and maintain the public traffic, which must not be interrupted by the operations of construction.

During the progress of the work below the level of the river it will flow in the temporary channel provided for it. As the dam rises to a higher level openings will be left in the masonry to accommodate the flow of the river, but inasmuch as in heavy frosts the openings would not be sufficient, the water may rise behind the dam, and, as it might overflow, it is to be always left at a lower level, at a point where the fall of the water cannot cause any permanent injury.

Before any of this work can be done a new channel for the river must be provided. This is to be done by excavating the river bed, and it will be necessary to build two or three temporary dams in connection with it for the purpose of excluding the water from the portion of the valley into which excavations are to be made. Then, too, it will be necessary to build new streets and new bridges and culverts to take the place of those that will be destroyed by the work.

On Wednesday of last week a man calling himself James Smith and describing himself as a hotel keeper in New York city, was seen before a Commissioner. Deeds named Watson, in which he alleged that Mrs. Buchanan had died of apoplexy. Smith appears to have got his information largely from the New York Herald, which on Wednesday of last week, the day of the deposition, had Dr. Buchanan in Halifax with a fatal stroke. Smith's story was that Mrs. Buchanan was a widow, and that she had been married to Dr. Buchanan, who was a physician in New York city, and that she had been married to Dr. Buchanan, who was a physician in New York city, and that she had been married to Dr. Buchanan, who was a physician in New York city.

Miss Kate R. Pike, the Treasury Department typewriter, who was found unconscious in her room at the Astor House on Saturday, with two others in her left wrist, declared yesterday that she had not attempted to commit suicide. When she went to the hotel, she was suffering from sleeplessness. Her head was aching, and she was feeling very much worse. She was found by a maid, who called for help, and she was taken to the hospital.

When the SUN reporter saw her yesterday she was in a very bad way. Her head was aching, and she was feeling very much worse. She was found by a maid, who called for help, and she was taken to the hospital.

What was in the letter addressed to your mother that was found in your room? I certainly did not intend to commit suicide. I had no reason for such an act.

Mr. W. H. Stevens, Miss Pike's brother-in-law, his wife, and a number of friends from Staten Island visited Miss Pike yesterday.

WITH WORTHLESS CHECKS. "Dr. Holcomb" of Newark Turns Out to be "Dr. Henry M. Holcomb" of New York. Dr. William Holcomb, who was arrested in Newark on Saturday night for obtaining furniture, jewelry, and other goods from merchants on fraudulent checks, was held yesterday to await developments, as it is believed new victims will turn up to-day. Yesterday afternoon Henry Kable of 354 East Eighty-third street, who was arrested on Saturday night, was held yesterday to await developments, as it is believed new victims will turn up to-day.

THIRD TO STRANGLE HIS WIFE. Edward P. Moran Becomes a Murderer After an Insane Freak. Police Officer Dunn of the Atlantic avenue station in Jersey City, arrested a woman's car on Saturday night, and found her husband, Edward P. Moran, who said he had killed her. Moran was found in the car, and he was taken to the hospital.
